CASE ANALYSIS

A Chinese multinational company (MNC) applying AI to its industrial processes, collects and transfers data among its international offices and subsidiaries including sub-contractors. Many of these data are collected through the MNC & subsidiaries online platforms. There is the suspect of a data breach. In compliance with the applicable rules and according to best cybersecurity processes, what should the MNC:

- o Have done in order to prevent the breach?
- o Do to identify and interrupt the breach?
